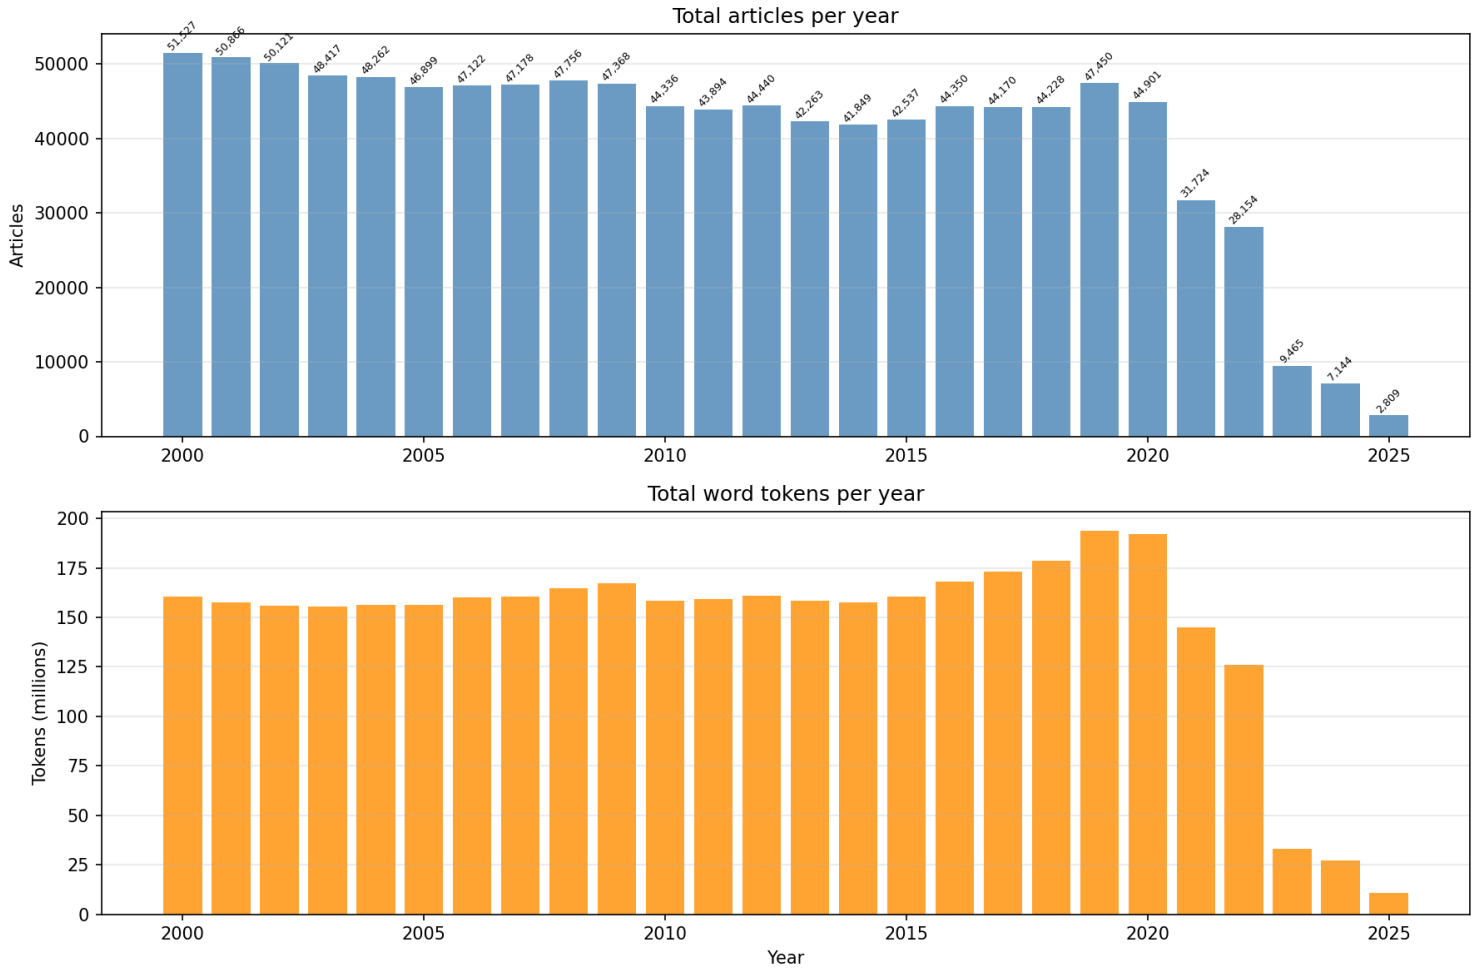
CS Terms in JSTOR Humanities Publications

Preliminary exploration of ~25 key terms across 1,049,373 full-text articles (2000-2025)

Vered Silber-Varod, Daniil Skorinkin, Nitza Geri

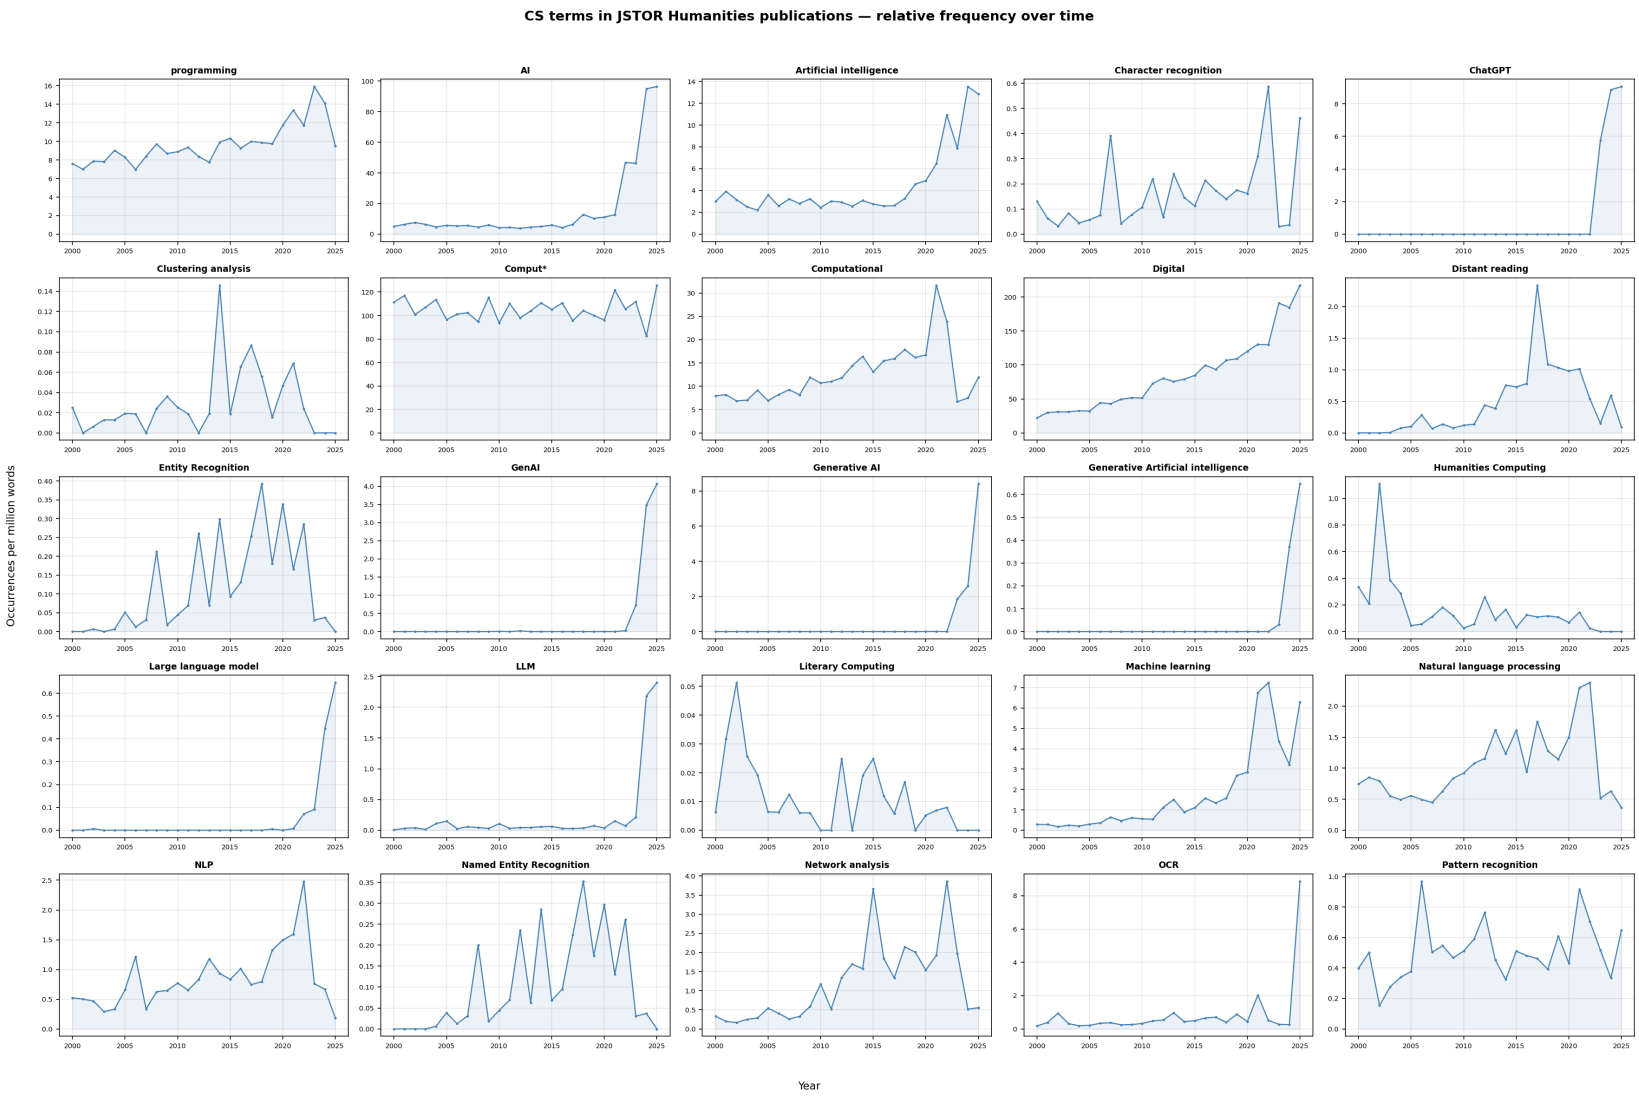
Draft -- April 2026

Corpus overview: articles and tokens per year



JSTOR Humanities (extended) full-text corpus, English, 2000-2025. Note the drop after ~2020 reflects JSTOR ingestion lag, not a real decline.

All 25 CS terms: relative frequency (per million words)



Each subplot shows occurrences per million words for one search term.
